

ShopEase — Features & Pricing Guide

Built for Nigerian vendors who sell on WhatsApp

Your WhatsApp hustle deserves a real store.

The problem

Running a business on WhatsApp means endless back-and-forth:

- "How much is this one?"
- "I sent the transfer, have you seen it?"
- "Is this still available? I need it today."
- "Which sizes do you have left?"

ShopEase automates the messages you repeat every day. Share one store link. Buyers see prices, stock, and pay via Paystack. You fulfil the order.

How it works

1. **Sign up and add your products** — Upload photos, set prices, and descriptions. Your store is ready in minutes.
 2. **Share your link everywhere** — Paste your store link in your WhatsApp bio, Status, or broadcasts.
 3. **Customers order and pay automatically** — Paystack handles checkout. You get notified. You just fulfil the order.
-

Pricing tiers

Tier	Price	Best for
Starter	Free	New sellers testing the platform
Pro	₦5,000/month	Growing stores that need automation

One extra sale per month covers the entire Pro plan.

Starter — Free
